

## PROJECT 1:

### Harmony

This was my senior project a few semesters ago and I'm really happy with how it came out. At the time I was trying to get comfortable with backends and frameworks, so I was really committed to the idea of building a working login and incorporating some integration with Spotify's API. While the API proved to be more than I was able to handle before the deadline, I still got a fully functioning login page that I was really proud of, as well as a visual premise that I was mostly happy with.

## PROJECT 2:

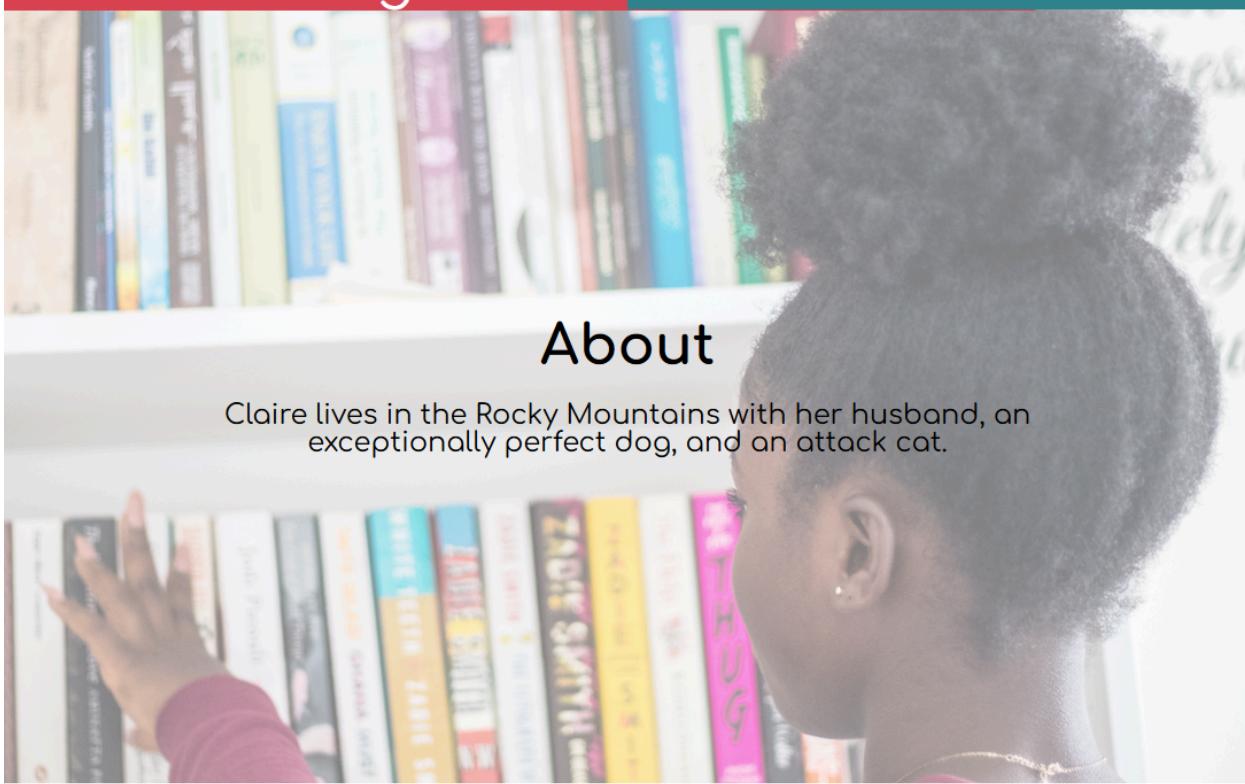

### Claire Sinagra

The first of several projects featured here that showcase more of my ability than my creative process. While I was largely responsible for placement, all elements, colors and text were decided beforehand.

This site is viewable at multiple sizes, everything scales correctly to your screen and none of the elements break when the page is resized. SEO and compatibility testing were performed as well as heuristics testing. I wanted to have at least one of the projects in the portfolio demonstrate some more high-level understanding of web development concepts.

## About

Claire lives in the Rocky Mountains with her husband, an exceptionally perfect dog, and an attack cat.

## Books

Claire's books have received starred reviews in Publishers Weekly, Library Journal, and Booklist. She is a New York Times and a USA Today bestseller and a RITA® winner.

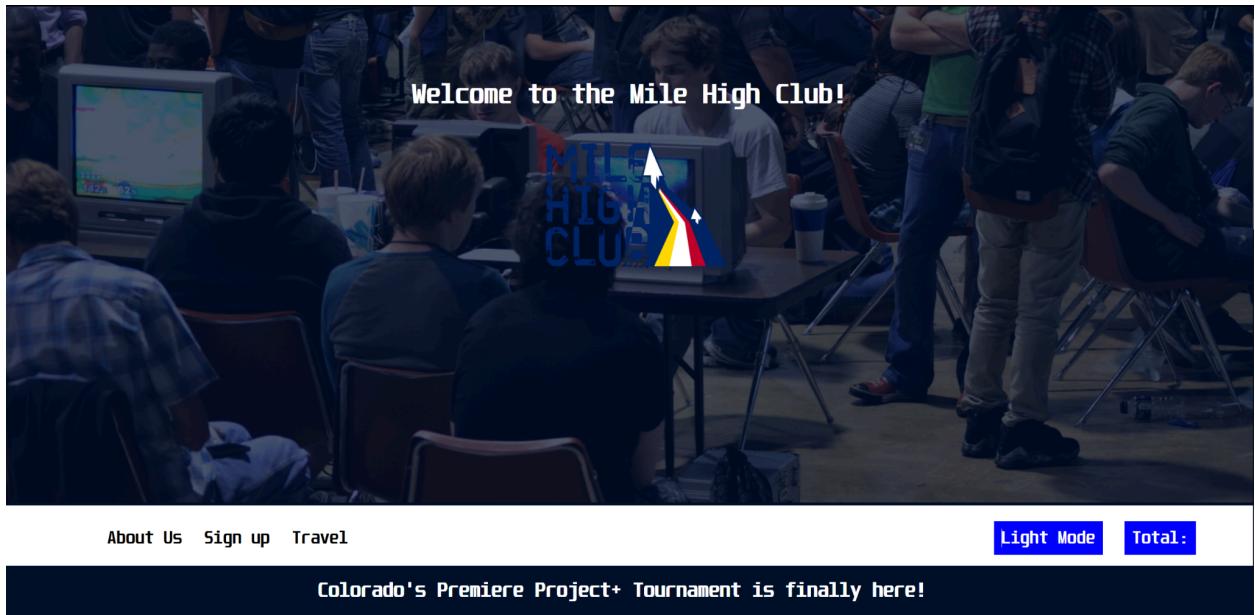

### PROJECT 3:

#### Mile High Club

Another project that ended up as a final, this one used graphics I created for an event that several friends of mine were holding. It started out as a project to demonstrate my Javascript

proficiency, with a working dark mode toggle and shopping cart, but I ended up stumbling into a retro-computer visual style that I'm really endeared to, so I wanted to show it off.

#### PROJECT 4:

#### TK Photography

This is a photo gallery project that I worked on early on while I was still learning. It was a small project, and I don't think it left very much room for me to be creative, but its simple and elegant, and most importantly, the whole page works at every possible size.

ABOUT GALLERY CONTACT

## GALLERY

Here are some highlights of my work. The locations and year are in the caption.

CHILE, 2001

IRAN, 1999

GUATEMALA, 1997

HAWAII, 2010

## ABOUT

Hello!  
I'm TK and I'm a photographer.  
I love looking at life through the lens of my camera.  
Landscape photography is my speciality and it's taken me  
all over the world.

## PROJECT 5:

### Recipe Site

This is another early project, and I want to be selective with what aspects I show because I don't think it looks very good at larger sizes. What I do want to show though, is the site's UI, which was the main focus for the project. Toggleable hamburger menus are difficult to do without any Javascript, and this site has one that took a lot of effort to make look perfect.

A screenshot of a mobile-style recipe website. At the top, there are three icons: a menu icon, a search icon, and a sign-in icon. Below the search bar is a vertical list of categories: BREAKFAST, BRUNCH, LUNCH, DINNER, APPETIZERS, DESSERTS, and BEVERAGES. At the bottom, there is a search bar with the placeholder "Find a recipe" and a magnifying glass icon, followed by a photo of two tacos on a colorful plate.
